IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

GERALD D. UNDERWOOD WATER TREATMENT FACILITY
PWSID NO.: MT0000153
MONITORING WAIVER FOR ASBESTOS (2020-2028)

On July 21, 2020, our water system was granted a waiver for asbestos sampling for the monitoring period 2020-2028. As our customers, you have a right to know why we are not sampling for asbestos.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether the drinking water has or has not met health standards. We will not conduct monitoring for asbestos because we have been granted a waiver by the Montana Department of Environmental Quality (DEQ). This waiver is based on our certification that there is no asbestos concrete pipe in the distribution system.

For more information, please contact Jason Fladland, Water Treatment Plant Manager, at 657-8347 or fladlandj@billingsmt.gov.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly. You can do this by posting this notice in a public place or distribution copies by hand or mail.

This notice is being sent to you by the City of Billings Gerald D. Underwood Water Treatment Facility.
